Richard Carrigan

Front-end Web Site/Application Developer

Summary

Web Developer with over 2 years experience in building, improving, and maintaining websites and web applications built with various technology stacks. I've managed multiple website projects up to and including recreating an entire website on WordPress in order to move from original, unresponsive PHP/Magento site. I'm able to multitask, prioritize, and manage tasks and individuals effectively to ensure timely completion and exceptional quality.

Experience

2012-08 - present

Front-end Web Developer, Operations Manager

Music Express LLC

Facilitated transition of both brand websites (accessbagsandcases.com, triad-orbit.com) from PHP/Magento to WordPress with the WooCommerce plugin, which improved SEO and ultimately let to over 200% increase in online direct sales. Aside from my responsibilities as the in-house developer, I also am responsible for all daily operations, between inventory management, order processing, database administration, procurement, sales forecasting, pricing strategy, email marketing, and ad hoc IT troubleshooting. My efforts have increased office productivity, inventory turnover, and sales revenue at a level previously unimaginable.

Education

2012-09 - 2016-06

Olympic College - Associate's in Accounting Technology

While pursuing my degree, I also took an interest in computer science. My relevant courses included: HTML, Information Systems Concepts, Integration of Software Applications, Java I - OOP, Operating Systems, Programming Concepts, SQL, User Interface Design, Web Development I and II, Web Multimedia, XML

2015-07 - present

Free Code Camp - Multiple Certifications

Completed certifications: Responsive Web Design, Javascript Algorithms and Data Structures
In process certification: Front End Libraries
Future certifications: Data Visualization, Apis and Microservices, Information Security and Quality Assurance
